

Continuous Improvement

- ☐ **Performance Improvement**
- ☐ Motivating the Team
- ☐ Coaching Individual Team Members
- ☐ Measuring Team Progress
- ☐ Team Learning

Performance Improvement (1/6)

- The rational of PI
 - State of mind and attitude
 - Dedication and commitment
- Performance improvement metrics
 - Productivity
 - Quality
 - Cost
 - Delivery

Performance Improvement (2/6)

- Principle of performance improvement
 - Everyone in team contributes to the team performance (P,Q,C,D)
 - Everyone at once time or another, can make major contribution
 - Everyone benefits direct/indirect
 - Everything can be improved
 - Problems, challenges and new test are opportunities to get better
- Why performance improvement?
 - Success, survival, satisfaction, and career development

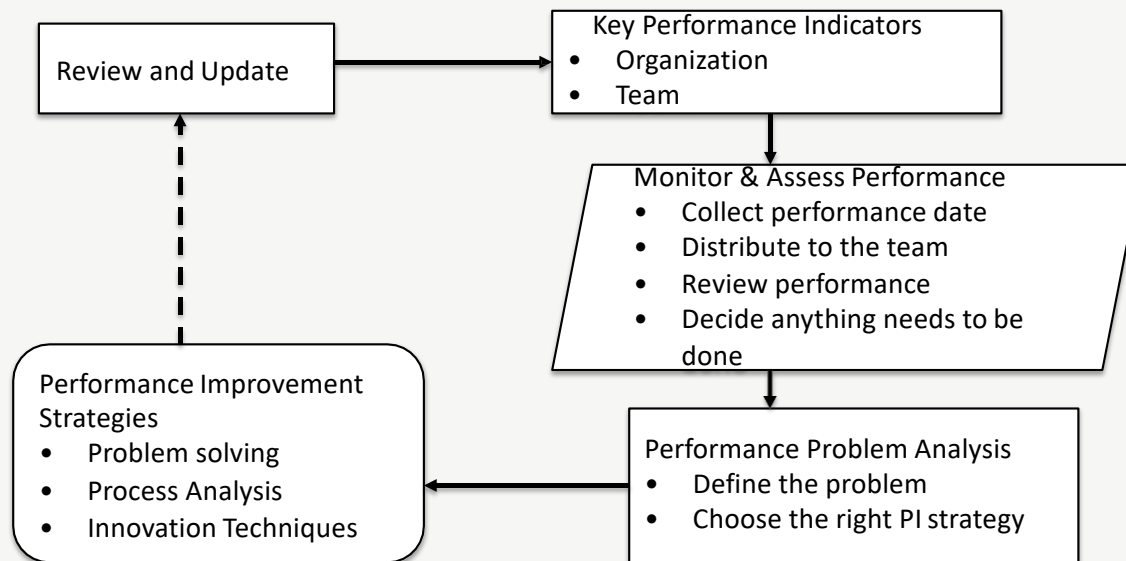

Performance Improvement (3/6)

- Team's role
 - Understanding the current performance standards
 - Tracking the team performance to meet the standards
 - Identifying areas of potential improvement
 - Helping develop solutions to challenges and problems as they arise
 - Sharing responsibility for implementing successful performance improvement strategies

Performance Improvement (4/6)

- **Team leader's role: To ensure that**
 - Team understands the rationale for PI
 - Team understands the key measure of performance for the organization
 - Each team member understands his/her role & contributing to the performance measure
 - Team members have the performance information to compare with standards
 - Team understands the benefit of improving performance and consequences of not having it
 - Team properly oriented and trained assist
 - Environment support performance improvement built up
 - Help the team to improve its performance

Performance Improvement (5/6)

Performance Improvement (6/6)

Additional issues in performance improvement

- Celebrating success
- Ideas that go nowhere
- Blockers at the boundary
- Scope

Continuous Improvement

- ☐ Performance Improvement

- ☐ Team Learning

Motivating the Team (1/3)

- We need to know about motivation
 - Needs theories:
 - Unsatisfied needs motivate people
 - Reinforcement theories:
 - People are motivated to do what they have been rewarded in the past
 - Expectancy theories:
 - People are motivated by an expectation of a future event
- Motivation have many facts and complex
- Understanding motivation's importance will lead to team problems

Motivating the Team (2/3)

- How to apply knowledge of motivation in the team setting
 - Identify motivational needs of the team
 - Identify motivational needs individuals
- Balancing individual motivation with team motivation
 - Find the differences and conflict
 - Balance them in several possibilities

Motivating the Team (3/3)

- Team reward and recognition options:

Pros and Cons

- Materials rewards (increase pay, bonus,...)
 - Symbolic rewards (trophies, plaques, titles,...)
 - Flexible work hour
 - Greater challenges or responsibilities
 - Improvement in the work setting
- Motivation needs will change overtime, so try to check them regularly with the team

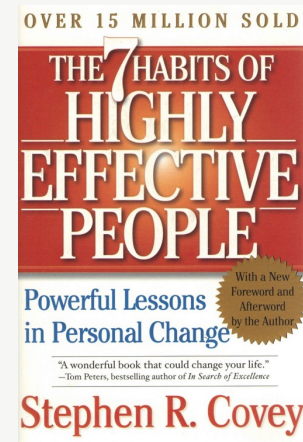

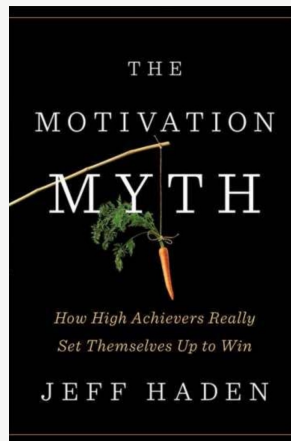

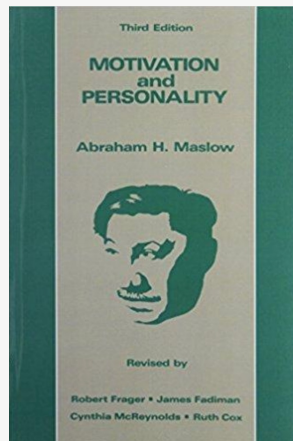

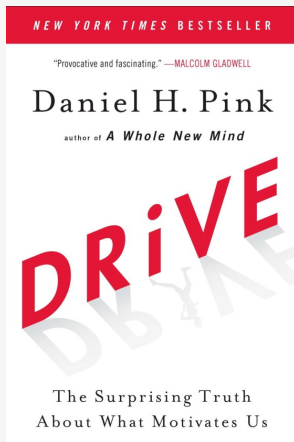

Motivating the Team (3/3)

- Team reward and recognition options:

Pros and Cons

- Materials rewards (increase pay, bonus,...)
 - Symbolic rewards (trophies, plaques, titles,...)
 - Flexible work hour
 - Greater challenges or responsibilities
 - Improvement in the work setting
- Motivation needs will change overtime, so try to check them regularly with the team

Continuous Improvement

- ☐ Performance Improvement
- ☐ Motivating the Team
- ☒ **Coaching Individual Team Members**
- ☐ Measuring Team Progress
- ☐ Team Learning

Coaching Individual Team Member (1/6)

- Why coaching is important?
 - Coaching involves providing relevant feedback to help the team learn and grow
 - Coaching helps redirect a team member when something has gone wrong
 - Coaching can be motivating when attention is paid to what has gone well
- Effective coaches do not tell people what to do

Coaching Individual Team Member (2/6)

The foundation of coaching

- Technical skills
- Interpersonal skills
 - Handling conflict within team and with others
 - Communicating effectively
 - Blending together different work styles or preferences
 - Resolving issues related to overlapping roles and responsibilities on the team

Technical Competence
+
Human Understanding
+
Communication
+
Conflict Management
+
Role Clarity

Coaching Individual Team Member (3/6)

Team's readiness for coaching and feedback

- What has been the greatest praise you got
- How did you react to positive feedback
- What has been the most challenging criticism you have received in work in the past
- How did you react to critical feedback
- How can others encourage you to overcome obstacles, meet challenges and perform at your highest level?

User Manual for each member ☺

Coaching Individual Team Member (4/6)

- Effective format for delivering feedback

- For negative and unreceptive team member
- For team member lacking in confidence
- For all team members

- Giving feedback

- Be specific
- Choose the right moment
- Ask the team member to summarize the feedback
- Listen to what the team member has to say
- If negative feedback, include positive message
- Focus on the problem, not on the person
- Judge the behavior, not the person

Coaching Individual Team Member (5/6)

- Developing action plan

- What did we learn?
- What will we do differently in the future?

- The objective to be accomplished
- When to start
- Resources needed
- How to know when objective accomplished
- Date for progress check

- Not more than 3 objectives
- Guide on challenging objective that can be achieved in near timeframe
- Let the team member builds the plan first

- Accountability and support of action Plans

Coaching Individual Team Member (6/6)

- Criteria for effective or **S.M.A.R.T** objective
 - *Specific*. Explicit, focused
 - *Measureable*. Able to state a measurable outcome or condition; quantifiable
 - *Achievable*. Practical, realistic
 - *Results oriented*. Identifies an outcome
 - *Time-constrained*. Having a deadline

Continuous Improvement

- ☐ Performance Improvement
- ☐ Motivating the Team
- ☐ Coaching Individual Team Members
- ☒ **Measuring Team Progress**
- ☐ Team Learning

Measuring Team Progress (1/5)

- Why perform a team assessment
 - To check the progress of the team in reaching its goals
 - To bring to light obvious or subtle difficulties within the team
 - To provide a baseline for team functioning against which the team can be measured in the future
 - To find strengths to celebrate in the team

Measuring Team Progress (2/5)

- Difficulties

- Need to find good ways to evaluate the team
- Take time to stop the team operations and evaluate
- Handle reluctance on some team members to engage in self-scrutiny
(Mọi người ngại nhìn lại chính mình)
- Lack of support from others in the organization

- Typical concerns about team assessments

- “We do not have enough time”
- “Why do we need to assess ourselves?”
- “I do not want to do any group hug, nor to tell my fellow team members what I do not like about them.”

Measuring Team Progress (3/5)

- A Short MultiRater Assessment

- ❖ **Process factors**

- Coordination
 - Communication
 - Risk taking
 - Conflict resolution
 - Diverse work styles
 - Decision making
 - Understanding and supporting teamwork
 - Shared goals
 - Clear roles

- ❖ **Outcome factors**

- Task accomplishment
 - Quality
 - Productivity
 - Customer satisfaction
 - Employee development
 - Turnover

Measuring Team Progress (4/5)

- A short multirater assessment

Outcome \ Process	Good	Bad
	Good	Bad
Good	This team focuses on relating effectively and getting the job done	May get the job done, but team members struggle in dealing effectively with each other
Bad	May like each other and get along well, but the team is not achieving its goals	Not a team

Measuring Team Progress (5/5)

- How to give the team constructive feedback: review the result
 - Areas that majority of team sees as strengths
 - Areas that majority of the team sees as developmental
 - Disparate areas where team members are split
- How to address areas of improvement for the team?
 - What should be done differently?

Continuous Improvement

- ☐ Performance Improvement
- ☐ Motivating the Team
- ☐ Coaching Individual Team Members
- ☐ Measuring Team Progress
- ☒ **Team Learning**

Team Learning (1/5)

- What is team learning?
 - Ability of a team to acquire, create, disseminate and apply info and knowledge gained thru reflection on team performance
- Why is team learning important?
 - Push the team to use its skills, knowledge and experience, leading to a more mature team
 - Give opportunity to examine its typical operating approach to work and problem-solving
 - Provide opportunity to clarify and question basic assumptions about functioning of the team
 - Stimulate new ideas and approaches to experimentation and rational risk taking

Team Learning (2/5)

- The steps in team learning
 - Asking questions
 - Seeking feedback
 - Discussing errors
 - Questioning assumptions
 - Experimenting
 - Monitoring results
 - Dissemination

Team Learning (3/5)

- What is the role of the team leader?
 - Legitimize the learning process
 - Train, facilitate, coach, observe
 - Acquire resources
 - Support and reinforce

Team Learning (4/5)

- Conditions and methods to facilitate team learning
 - A supportive, encouraging team leader
 - Confident team members
 - A spirit of experimentation
 - Permission to fail
 - A supportive organizational culture

Team Learning (5/5)

- Barriers to team learning and methods to minimize them
 - A bias toward action
 - Inability to reflect
 - Low risk taking
 - Managers who doubt their own ability
